

Customer Onboarding SOP

Independent portfolio case study · 30/60/90-day SaaS onboarding model

Purpose

Create a consistent path from signed customer to confident, value-oriented adoption while making ownership, risks and handoffs visible.

Days 0-30

Kickoff, stakeholder map, success criteria, access/configuration, training, first meaningful workflow and risk log.

Days 31-60

Adoption review, role-based reinforcement, friction removal, secondary workflow enablement and stakeholder engagement check.

Days 61-90

Value review, outcome evidence, ongoing success cadence, risk/opportunity review and next-quarter priorities.

Escalation rules

Escalate when impact is material, a blocker threatens a milestone, technical complexity requires specialist ownership, or a dependency cannot be resolved in the agreed operating window.

Metrics

Time to first value, milestone completion, activation, unresolved blockers, stakeholder participation and early adoption trend.

Case Study Disclaimer

This project uses simulated data and scenarios to demonstrate my methodology, decision-making, and approach to solving real-world customer success challenges.
